

# SLFRF APPLICATION

MAY 24, 2022

**AMENDED JULY 27, 2022**

*Davis County Emergency  
Operations Center*

Requested: \$15,000,000

## ARPA SCOPE OF WORK WORKSHEET

### 1. Overview

Federal Award Grant Name	Coronavirus State and Local Fiscal Recovery Funds (SLFRF)
Federal Assistance Listing Number	21.027
Subrecipient Name	Davis County Emergency Operations Center
Subrecipient's UEI or TIN	87-6000297
Subaward Start Date	2022
Subaward End Date	2024
1. Amount of Federal Funds Obligated in this SOW	\$15,000,000.00
2. Total Amount of ALL Federal Funds Obligated to Subrecipient from Davis County (including this SOW)	\$15,000,000.00
Federal Award Agency	US Department of Treasury
Pass-through Entity	Davis County, Utah
Awarding Official	<b>Name:</b> Curtis Koch <b>Title:</b> Davis County Clerk Auditor <b>Address:</b> Davis County Admin Building 61 South Main Street Farmington, Utah 84025 <b>Phone:</b> (801) 451-3491 <b>Email:</b> Ckoch@co.davis.ut.us
After Approval by Davis County Commissioners	
Primary Contact	<b>Name:</b> Mitch Matern <b>Title:</b> Project Manager <b>Phone:</b> 801-451-4252 <b>Email:</b> mitch@co.davis.ut.us <b>Mailing Address:</b> 800 W State St Farmington UT 84025

## 2. Expenditure Categories

<b>Eligible Category</b>	1. To respond to the COVID-19 public health emergency or its negative economic impacts
<b>Expenditure Category Number</b>	1.7
<b>Expenditure Category Name</b>	1.7 Other COVID-19 Public Health Expenses (including Communications, Enforcement, Isolation/Quarantine)

### COVID Impact Statement

Davis County's population is over 355,000 people and is Utah's third most populous County. Davis County is also the smallest geographic County in the State of Utah, making it very densely populated. The County is wedged between the Great Salt Lake and the Wasatch Mountains in the northern part of the State.

Davis County is home to the largest number of earthquake faults in Utah as well as the highest hazmat threats. The hazmat threats include, but are not limited to, Hill Air Force Base, three refineries (two more just outside the border), and high transmission pipelines for oil, natural gas, alternate fuels, and water.

Davis County has three rail lines running the length of our County, two industrial and one passenger. The passenger transports thousands of people throughout the County each day while the industrial lines transport significant amounts of hazardous materials. Davis County also has several major arterial freeways/highways, including Interstate 15, Legacy Parkway, and Highway 89. Threats from downed aircraft are also significant as we have a small Woods Cross City Airport and Hill Air Force Base, and we are on the flight path for Salt Lake International Airport.

Wildfire threatens Davis County on both the east and west sides. Running the length of the County, the wildlands have been subject to several wildfires in recent years. As the population of Utah continues to grow faster than 48 other states, the wild spaces are being infringed upon for housing and industry causing more significant threats.

As a whole Davis County has suffered from landslides and flooding and has a significant number of high wind events each year. In 2020, Davis County had high winds and earthquakes, resulting in a federally declared disaster. Utah is currently suffering from extreme drought and low precipitation. The extreme temperature ranges in Utah seem to be worsening, calling for more focus on heating and cooling options for more vulnerable populations.

Davis County is home to several small cities. These cities do not typically have a significant amount of resources, and due to budgetary constraints do not employ consistent emergency management staff. This means many of the cities look to Davis County for support. During Covid-19, Davis County has assisted municipalities and responded to two significant earthquakes, flooding from a 100-year storm event, tornado damage, wildfire, high wind events, civil unrest, and drought.

Covid-19 complicates all aspects of the above-listed hazards, threats, or disasters. The need for our emergency management staff to have the space to collaborate, plan, train, and educate has never been greater. In our current scenario, we do not have the space or technology to effectively operate as we should moving into the future. The construction of an emergency management center would allow the County to make up a significant amount of ground in disaster operations and responding to Covid-19.

### 3. Staffing

*Provide list of staff committed to each activity in the statement of work.*

<b>Key Staff Name</b>	<b>Title</b>
Joseph Langkilde	CPA/Business Manager, Davis County Sheriff's Office
Mitch Matern	Facilities Manager, Project Manager, Davis County Sheriff's Office
Chad Monroe	Sheriff Special Emergency Manager

*Any changes in the key personnel assigned or their general responsibilities under this project are subject to the prior approval of Davis County.*

#### 4. Performance Monitoring

Davis County will monitor the performance of the Subrecipient against goals and performance standards as stated above. Substandard performance as determined by Davis County will constitute noncompliance with this Agreement. If action to correct such substandard performance is not taken by the Subrecipient within a reasonable period of time after being notified by Davis County, contract suspension or termination procedures will be initiated.

##### Statement of Work

Davis County's population is over 355,000 people and is Utah's third most populous County. Davis County is also the smallest geographic County in the State of Utah making it very densely populated. The County is wedged between the Great Salt Lake and the Wasatch Mountains in the northern part of the State.

Davis County is home to the largest number of earthquake faults in Utah as well as the highest hazmat threats. The hazmat threats include, but are not limited to, Hill Air Force Base, three refineries (two more just outside the border), and high transmission pipelines for oil, natural gas, alternate fuels, and water.

Davis County has three rail lines running the length of our County, two industrial and one passenger. The passenger transports thousands of people throughout the County each day while the industrial lines transport significant amounts of hazardous materials. Davis County also has several major arterial freeways/highways including Interstate 15, Legacy Parkway, and Highway 89. Threats from downed aircraft are also significant as we have a small Woods Cross City Airport, Hill Air Force Base, and we are in the flight path for Salt Lake International Airport.

Wildfire threatens Davis County on both the east and west sides. running the length of the County, the wild lands have been subject to several wildfires in recent years. As the population of Utah continues to grow faster than 48 other states, the wild spaces are being encroached upon for housing and industry causing greater threats.

As a whole Davis County has suffered from landslides, flooding, and has a significant number of high wind events each year. In 2020, Davis County had high winds and earthquakes, resulting in a federally declared disaster. Utah is currently suffering from extreme drought and low precipitation. The extreme temperature ranges in Utah seem to be worsening, calling for more focus on heating and cooling options for more vulnerable populations.

Davis County is home to a number of small cities. These cities do not typically have a significant amount of resources and do not employ consistent emergency management staff due to budgetary constraints. This means many of the cities look to Davis County for support. During Covid-19, Davis County has assisted cities and responded to two significant

earthquakes, flooding from a 100-year storm event, tornado damage, wildfire, high wind events, civil unrest, and drought.

Covid-19 continues to complicate all aspects of the above-listed hazards, threats, or disasters. The need for our emergency management staff to have the space to collaborate, plan, train, and educate has never been greater. In our current scenario, we do not have the space or technology to effectively operate as we should moving into the future. The construction of an emergency management center would allow the County to make up a significant amount of ground in disaster operations and responding to Covid-19.

**Description of population to receive assistance**

Davis County is home to more than 355,000 residents. The population has maintained a moderate to high Covid-19 transmission rate though most of the pandemic, with the total number of reported positive cases exceeding 99,584. The total death toll for the County due to Covid-19 has exceeded 373.

The County itself has over 1,000 employees without counting the employees of the fifteen cities. These employees rely on us to provide education. Proper guidance and protection from Covid-19 while serving the public. Hill Air Force Base brings in over 10,000 people each day, including service men and women, contractors, and visitors. Any Covid-19 outbreak on base are sent to our community hospitals and back into the Davis County community. Covid-19 is a real threat at Lagoon Amusement Park, the largest amusement in the State with a capacity of 30,000.

The need to help both public and private organizations has become a necessity regarding Covid-19 as it affects the community as a whole. Davis County is the biggest in the State's northern region, meaning Davis County is called upon frequently by other cities, counties, and state jurisdictions for assistance. Covid-19 and other threats are causing Davis County to respond not only to our population but also to those jurisdictions around us who require assistance.

<b>Physical location where assistance will be provided</b>	Davis County Sheriff's Office 800 West State Street Farmington UT 84025
<b>Geographic Service Area(s)</b>	Davis County, Utah

**Project Outline**

The construction of an emergency operations center will house the day-to-day operations of the Emergency Manager and staff along with an operations center. This center will also be a training venue for exercises, education, and FEMA-approved courses. Volunteer Program collaboration and networking will also be accomplished in this facility.

The facility is a stand-alone building with all the necessary equipment and technology to withstand a natural disaster and the redundancies to allow for continuous operation during a disaster. The facility will also offer storage for emergency management equipment and supplies such as personal protective equipment (PPE) for COVID-19 response.

The project will be assisted and managed by the Sheriff's Officer Director Of Facilities, Mitch Matern. Matern will be assisted by Emergency Manager Chad Monroe, Andrew Oblad, Sheriff's Chief Deputy, and Joseph Langkilde Business Manager

### **Project Outcome**

The benefits of having an emergency management center are countless. With the county population of over 355,000, unduplicated persons who could be serviced are limitless. It is highly likely to impact our citizens' lives without them knowing during the Covid-19 response and other disasters. The specialized work that takes place in this type of facility is invisible to the average citizen or government employee.

A measure of our success is to have partners in both government and private sector trust in our capabilities and partnerships without hesitation. The work that has and continues to take place regarding Covid-19 behind the scenes will never be known by the majority of people. This behind the scenes organization, response, mitigation, and recovery is what has really made a difference in our communities regarding Covid-19.

Covid-19 has forced us into an age of preparedness. Out of this facility we will see our successes and grow at our local community level. We will see better trained responders, better communications, and better overall yearly mitigation projects to protect against Covid-19 and other disasters. As we become better prepared, we will see the need for additional personnel in emergency management in the County and will measure much of our success in the growth of our program, training our community, and assisting in running successful operations under NIMS and ICS as a whole.

Our positive influence in the local community, State of Utah, and Nation will stand the test of time and be a source of pride for Davis County. Our greatest success will be as we look back on how much we were able to help prepare our communities during blue sky times and respond successfully in those times of need.

## 5. Schedule/Timeline

*Timeline reflect the time from the start to end of subaward date.*

*Budget calculations should match figures in budget table.*

	2Q 2022	3Q 2022	4Q 2022	CY 2023	CY 2024
Activities	Planning	RFP for architect	Design	Construction	Construction
Budget Expenditures (SOW funding source only)	\$1,000,000	\$1,000,000	\$1,000,000.00	\$6,000,000.00	\$6,000,000.00

List all obligated funding sources individually and funding amounts for this project.

Funding Sources	Amount
ARPA	\$15,000,000.00

## 6. Budget Non-Construction

	ARPA	Other Federal Grants	State Funding	Local Funding, Grants, Donations	Other
Personnel					
Fringe Benefits					
Travel					
Supplies
