Influenza activity in Davis County remains at a **low** level. The school absentee rate for Week 46 (8.92%) is higher than what it has been in the past, which could be in part due to COVID-19 (see Figure 1). For the 2021-22 influenza season five new clinics started reporting ILI rates. This data has been retroactively added to the aggregate ILI rates in Figure 2. There were zero hospitalized influenza cases and ILI rates were low during week 46.

*Due to delays in reporting, this data is provisional.*
INFLUENZA ACTIVITY IN UTAH*

Utah’s influenza severity estimate is currently at a low level during Week 46. There were no hospitalized influenza cases reported during Week 46 in the state of Utah, with a total of seven hospitalizations so far this season.

Surveillance data for influenza testing in laboratories across Utah indicate that 22 specimens were positive for influenza during Week 46. The predominant virus currently circulating in the community is influenza A.

INFLUENZA ACTIVITY IN THE UNITED STATES**

During Week 45, influenza activity was low overall in the United States, however, zero states reported no activity. Forty states reported minimal activity, eight states reported low (including Utah) activity, one state reported moderate activity, and one state reported high activity (see Figure 3).

Collaborating clinical laboratories across the United States reported that 0.7% of respiratory specimens tested were positive for influenza in Week 45. Of those, 97.1% were typed as influenza A and 2.9% as influenza B.

CDC performs genetic and antigenic characterization of U.S. viruses submitted from state and local laboratories. The specimens are also tested for susceptibility of influenza virus to antiviral medications. Virus characterization data will be updated later this season when a sufficient number of specimens have been tested.

VACCINE INFORMATION

CDC recommends that all persons older than 6 months of age receive an influenza vaccine by the end of October.

Flu shots are available at Davis County Health Department at no out-of-pocket cost for those with contracted health insurance.

For those without insurance:
- Adults (19—49) can receive the flu shot for $35.
- Adults and Seniors (50+ years) can receive the flu shot for $70.
- Children and adolescents (<19 years) may receive the vaccine for an $8 fee.

For additional information, call the Immunizations Hotline at (801) 525-5020.
