Influenza activity in Davis County is currently at a minimal level. The school absentee rate for Week 7 (7.35%) is lower than what it has been in the past (see Figure 1). There were no influenza-associated hospitalizations reported in Week 7. Updated ILI rates for this season can be found in Figure 2.

Figure 1. Elementary School Absence Rate, Davis County, 2021-22, 2019-20, 5-Year Average

Figure 2. Influenza-like-Illness rate and Hospitalized Influenza Cases, by subtype and admission date, Davis County, 2021-22

Influenza-like Illness (ILI) is defined as fever (temperature of ≥ 100°F [37.8°C]), cough, and/or a sore throat without a known cause other than influenza.
INFLUENZA ACTIVITY IN UTAH*

Utah’s influenza severity was estimated at a low level during Week 6. There were 10 hospitalized influenza cases reported during Week 6 in the state of Utah, with a total of 247 hospitalizations so far this season.

Surveillance data for influenza testing in laboratories across Utah indicate that 163 specimens were positive for influenza during Week 6. The predominant virus currently circulating in the community is influenza A (H3N2).

INFLUENZA ACTIVITY IN THE UNITED STATES**

During Week 6, influenza activity declined slightly in the United States, with all states reporting influenza activity. Forty-two states reported minimal (including Utah) activity, and eight states reported low activity (see Figure 3).

Collaborating clinical laboratories across the United States reported that 3.0% of respiratory specimens tested were positive for influenza in Week 5. Of those, 98.2% were typed as influenza A and 1.8% as influenza B.

CDC performs genetic and antigenic characterization of U.S. viruses submitted from state and local laboratories. The specimens are also tested for susceptibility of influenza virus to antiviral medications. Virus characterization data will be updated later this season when a sufficient number of specimens have been tested.

VACCINE INFORMATION

CDC recommends that all persons older than 6 months of age receive an influenza vaccine by the end of October. Flu shots are available at Davis County Health Department at no out-of-pocket cost for those with contracted health insurance. For those without insurance:

- Adults (19—49) can receive the flu shot for $35.
- Adults and Seniors (50+ years) can receive the flu shot for $70.
- Children and adolescents (<19 years) may receive the vaccine for an $8 fee.

For additional information, call the Immunizations Hotline at (801) 525-5020.

The Davis County Influenza Report is published weekly during influenza season. To receive a copy of this report by email or fax, please contact Brandon Beagles at bbeagles@co.davis.ut.us
