

# Respiratory Illness Report - Week ending May 18, 2024

Published May 23, 2024

## Overview

COVID-19 Wastewater Surveillance: As of May 16, overall statewide viral concentrations in wastewater have had a small increase, but still remain low. There are two sites (5.7%) in the Elevated category, nine sites (25.7%) in the Watch category, and 24 sites (68.6%) in the Low category. In Davis County, the North Davis site (Layton/Clearfield/Syracuse/West Point area) and the South Davis-North site (Woods Cross/Bountiful/West Bountiful/Centerville area) both increased to the Watch category. The other two sites remain in the Low category. Explore statewide wastewater surveillance data at <https://avrpublish.dhhs.utah.gov/uwss/>.

## Influenza-Like Illness

Graph 1 displays the weekly percentage of outpatient visits due to influenza-like illness (ILI). For comparison, the dashed line shows the previous 5-year average (2018-2022) of ILI activity. This week's ILI rate was 1.4%.

Graph 1. Percent of Outpatient Visits due to Influenza-Like Illness, by Week, Davis County, Utah

## School Absenteeism

Graph 2 displays the weekly percentage of elementary school absenteeism in Davis School District. For comparison, the dashed line shows the absenteeism rate of the previous 5 school years (school years beginning 2018-2022). This week's absenteeism rate was 5.2%.

# Emergency Department Visits

Graph 3 displays the rolling 7 day average of the percent of emergency department (ED) visits due to COVID-19, influenza, and respiratory syncytial virus (RSV). These data are obtained from syndromic surveillance and only consider the diagnosis discharge codes for each condition. Table 1 presents two data points for each virus: the current trend of ED visits (increasing, decreasing, or no change), and the percent of ED visits due to each during the currently reported week.

Graph 3. Percent of ED Visits due to COVID-19, Influenza, & RSV, Rolling 7-day Average, Davis County, Utah

Table 1: Recent Trends of ED Visits, Davis County, Utah, for Week Ending May 18, 2024

Virus	Trend	Percent of ED Visits
COVID-19	Plateau/no trend (last 14 days)	0.3 %
Influenza	Decreasing (last 7 days)	0 %
RSV	Increasing (last 14 days)	0 %

# Hospitalizations

Graph 4 displays the weekly number of hospitalizations due to COVID-19 and influenza.
