

# Respiratory Illness Report - Week ending March 21, 2026

Published March 24, 2026

## Overview

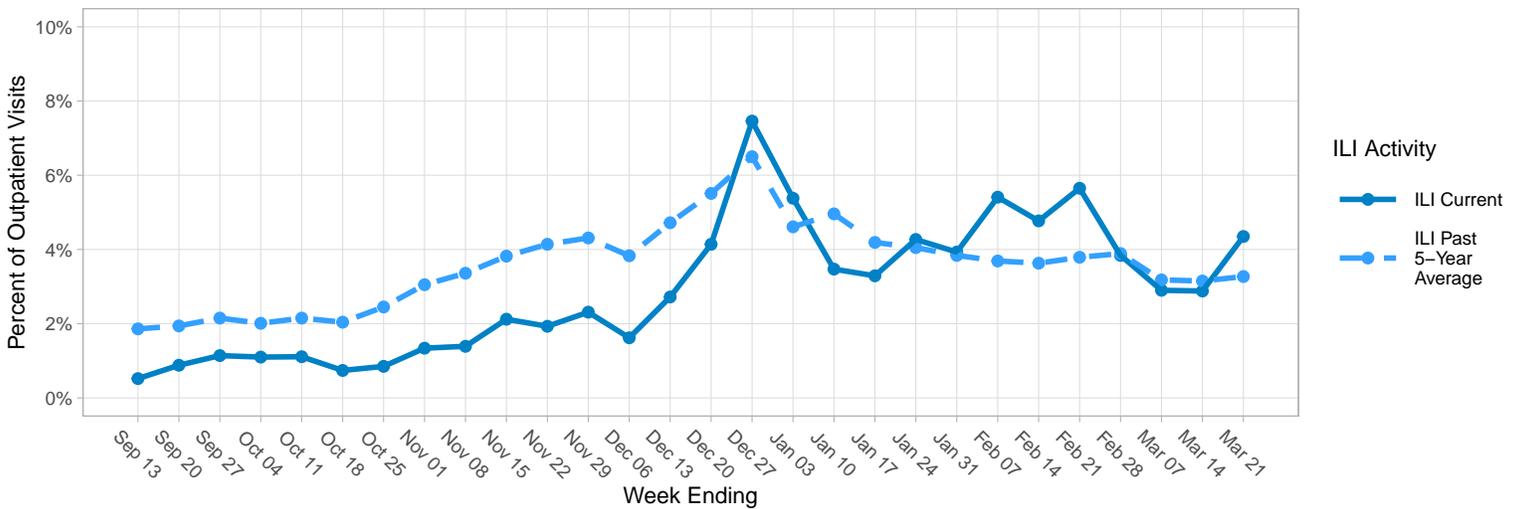

**Influenza:** In Utah, both influenza-like illness (ILI) and influenza-associated hospitalizations are in low severity. In Davis County, ILI activity is minimal.

**COVID-19 Wastewater Surveillance:** As of March 17, overall statewide viral concentrations of SARS-CoV-2 in wastewater remained stable and low. There is 1 site (2.9%) in the watch category, 8 sites (22.9%) in the low category, and 26 sites (74.3%) in the very low category. In Davis County, all four sites are in the very low category. Explore statewide wastewater surveillance data and trends at <https://avrpUBLIC.dhhs.utah.gov/uwss/>.

## Influenza-Like Illness

Graph 1 displays the weekly percentage of outpatient visits due to influenza-like illness (ILI). For comparison, the dashed line shows the previous 5-year average (2020-2024) of ILI activity. This week's ILI rate was 4.3%.

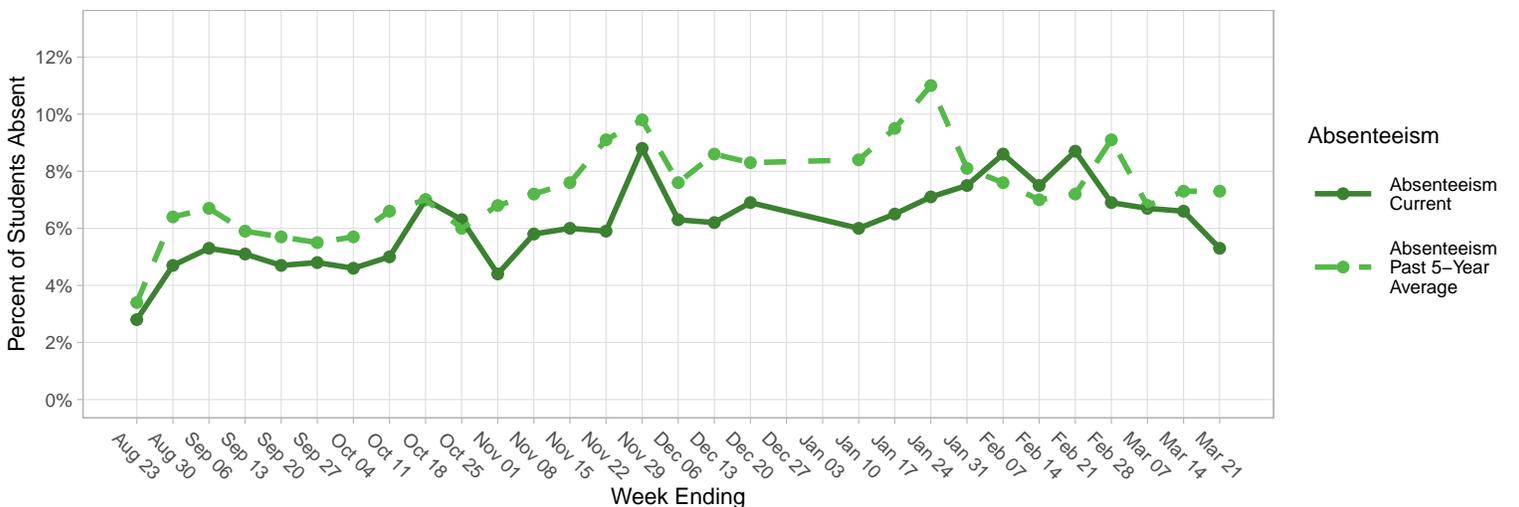

Graph 1. Percent of Outpatient Visits due to Influenza-Like Illness, by Week, Davis County, Utah

## School Absenteeism

Graph 2 displays the weekly percentage of elementary school absenteeism in Davis School District. For comparison, the dashed line shows the absenteeism rate of the previous 5 school years (school years beginning 2020-2024). This week's absenteeism rate was 5.3%.

Graph 2. Percentage of Elementary School Absenteeism, by Week, Davis School District, Utah

# Emergency Department Visits

Graph 3 displays the rolling 7 day average of the percent of emergency department (ED) visits due to COVID-19, influenza, and respiratory syncytial virus (RSV). These data are obtained from syndromic surveillance and only consider the diagnosis discharge codes for each condition. Table 1 presents two data points for each virus: the current trend of ED visits (increasing, decreasing, or no change), and the percent of ED visits due to each during the currently reported week.

Graph 3. Percent of ED Visits due to COVID-19, Influenza, & RSV, Rolling 7-day Average, Davis County, Utah

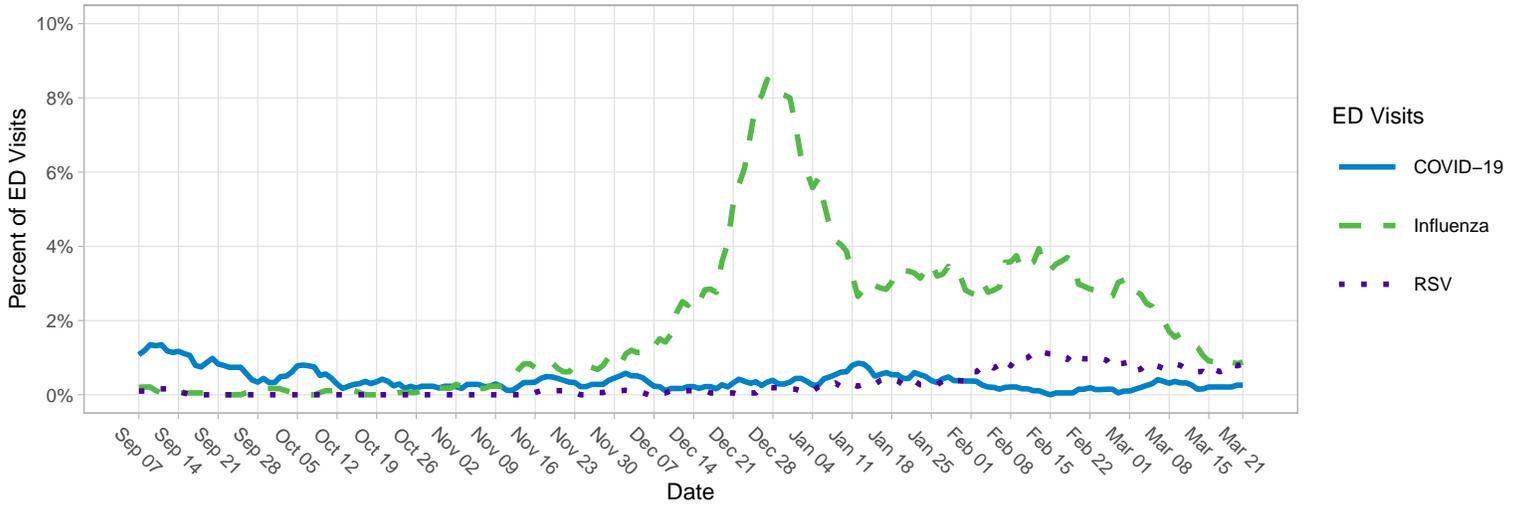

Table 1: Recent Trends of ED Visits, Davis County, Utah, for Week Ending Mar 21, 2026

Virus	Trend	Percent of All ED Visits
COVID-19	Plateau/no trend (last 14 days)	0.3 %
Influenza	Decreasing (last 14 days)	0.9 %
RSV	Increasing (last 7 days)	0.8 %

# Hospitalizations

Graph 4 displays the weekly rate of hospitalizations per 100,000 people due to COVID-19 and influenza.

Graph 4. Rate of Hospitalizations due to COVID-19 & Influenza, per 100,000 People, Davis County, Utah
