Influenza activity in Davis County is currently at a high level. Due to winter recess there is no school absenteeism data to report for Week 52 (see Figure 1). There were 12 hospitalized influenza cases reported in Davis County during Week 1, bringing the season total to 30 cases. Although the number of hospitalized cases increased, the influenza-like illness (ILI) rate (4.9%) decreased slightly in Week 1 (see Figure 2).

INFLUENZA ACTIVITY IN UTAH*

Utah’s influenza severity estimate remained at a moderate level during Week 1. There were 61 hospitalized influenza cases reported during Week 1 in the state of Utah, with a total of 255 cases so far this season.

Surveillance data for influenza testing in laboratories across Utah indicate that 845 specimens were positive for influenza during Week 1. The predominant circulating virus this week remains influenza B. It is also the predominant circulating virus thus far this season.

INFLUENZA ACTIVITY IN THE UNITED STATES**

Influenza activity in the United States continues to increase. During Week 52, one state reported local activity, four states reported regional activity, and 45 states (including Utah) reported widespread activity (see Figure 3).

Collaborating clinical laboratories across the United States reported that 26.3% of respiratory specimens tested were positive for influenza in Week 52. Of those, 32.1% were typed as influenza A and 67.9% as influenza B.

CDC antigenically characterizes virus samples to evaluate vaccine efficacy. Currently, 69.3% of influenza A and 65.0% of influenza B samples are similar to this season’s vaccine. CDC also tests for resistance to four antiviral medications (oseltamivir, peramivir, zanamivir, and baloxavir); 99.5% of samples tested show no resistance. Antiviral treatment is recommended as early as possible for patients with severe illness or who require hospitalization.

CDC recommends that all persons older than 6 months of age receive an influenza vaccine by the end of October.

Flu shots are available at Davis County Health Department at no out-of-pocket cost for those with contracted health insurance.

For those without insurance:

- Adults (19+ years) can receive the flu shot for $30.
- Seniors (65+ years) can receive high-dose Fluzone® for $45.
- Children and adolescents (<19 years) may receive the vaccine for an $8 fee.

For additional information, call the Immunizations Hotline at (801) 525-5020.

The Davis County Influenza Report is published weekly on Thursdays during influenza season. To receive a copy of this report by email or fax, please contact Caitlin Pratt at cpratt@co.davis.ut.us.
