DAVIS COUNTY

INFLUENZA REPORT

2019-20 Influenza Season Week 3 — Week Ending 01/18/2020

INFLUENZA ACTIVITY IN DAVIS COUNTY

Influenza activity in Davis County increased back to a high level. The school absentee rate (5.89%) was comparable to what has been seen in recent years (see Figure 1). There were nine hospitalized influenza cases reported in Davis County during Week 3, bringing the season total to 46 cases. The number of hospitalized cases and the influenza-like illness (ILI) rate (5.6%) both increased during Week 3 (see Figure 2).

INFLUENZA ACTIVITY IN UTAH*

Utah’s influenza severity estimate increased to a high level during Week 3. There were 71 hospitalized influenza cases reported during Week 3 in the state of Utah, with a total of 406 cases so far this season.

Surveillance data for influenza testing in laboratories across Utah indicate that 1,077 specimens were positive for influenza during Week 3. The predominant circulating virus this week remains influenza B, however influenza A has been increasing in recent weeks.

INFLUENZA ACTIVITY IN THE UNITED STATES**

Influenza activity in the United States remains high, however severity has decreased. During Week 2, one state reported local activity, one state reported regional activity, and 48 states (including Utah) reported widespread activity (see Figure 3).

Collaborating clinical laboratories across the United States reported that 22.9% of respiratory specimens tested were positive for influenza in Week 2. Of those, 42.0% were typed as influenza A and 58.0% as influenza B.

CDC antigenically characterizes virus samples to evaluate vaccine efficacy. Currently, 69.3% of influenza A and 65.0% of influenza B samples are similar to this season’s vaccine. CDC also tests for resistance to four antiviral medications (oseltamivir, peramivir, zanamivir, and baloxavir); 99.5% of samples tested show no resistance. Antiviral treatment is recommended as early as possible for patients with severe illness or who require hospitalization.

**For more information regarding influenza activity nationwide, please visit: https://www.cdc.gov/flu/weekly/

CDC recommends that all persons older than 6 months of age receive an influenza vaccine by the end of October.

Flu shots are available at Davis County Health Department at no out-of-pocket cost for those with contracted health insurance.

For those without insurance:
- Adults (19+ years) can receive the flu shot for $30.
- Seniors (65+ years) can receive high-dose Fluzone® for $45.
- Children and adolescents (<19 years) may receive the vaccine for an $8 fee.

For additional information, call the Immunizations Hotline at (801) 525-5020.
