**Davis County Small Area Health Profile**

**Demographics**

- Number of Persons: 2014: 70,644
- Persons Living in Poverty: 2014: 8.9%

**Health Status**

- Life Expectancy at Birth in Years: 2010-2014: 78.4
- Reported Fair or Poor Health Status: 2012-2014: 14.2%
- Reported Poor Physical Health for Seven or More of the Past 30 Days: 2012-2014: 15.0%

**Challenges**

- Current challenges include health care access, particularly in rural areas. There is a need for more health care providers and improved transportation to access care.

**Strengths**

- The community has strong social connections and a supportive network. There is a high rate of volunteering and community engagement.

**Methods**

- Data was collected through interviews, surveys, and population surveys. The 2012-2014 data was analyzed to provide insights into the health status and demographics of the area.

**Recommendations**

- Increase access to health care services, particularly in rural areas.
- Improve transportation options to access health care facilities.
- Increase awareness and education on health-related issues.

**Notes**

- Data from various sources, including Utah Department of Health and Human Services, UnitedHealthcare, and other federal and state agencies.
- The data provides a comprehensive view of the health landscape in Davis County, informing policy and resource allocation.
