

SLFRF APPLICATION

MAY 24, 2022

AMENDED JULY 27, 2022

*Davis County Health Department
Ongoing COVID Response*

Requested: \$2,700,000

ARPA SCOPE OF WORK WORKSHEET

1. Overview

Federal Award Grant Name	Coronavirus State and Local Fiscal Recovery Funds (SLFRF)
Federal Assistance Listing Number	21.027
Subrecipient Name	Davis County Health Department
Subrecipient's UEI or TIN	87-6000297
Subaward Start Date	Date approved
Subaward End Date	12/31/2022
Amount of Federal Funds Obligated in this SOW	\$2,700,000.00
Total Amount of ALL Federal Funds Obligated to Subrecipient from Davis County (including this SOW)	\$3,403,516
Federal Award Agency	US Department of Treasury
Pass-through Entity	Davis County, Utah
Awarding Official After Approval by Davis County Commissioners	Name: Curtis Koch Title: Davis County Clerk Auditor Address: Davis County Admin Building 61 South Main Street Farmington, Utah 84025 Phone: (801) 451-3491 Email: Ckoch@co.davis.ut.us
Primary Contact	Name: Diana Reich Title: Health Administration Services Manager Phone: 801-525-5166 Email: dianar@co.davis.ut.us Mailing Address: 22 State St 2nd Floor Clearfield, UT 84015

2. Expenditure Categories

Eligible Category	1. Public Health To respond to the COVID-19 public health emergency or its negative economic impacts
Expenditure Category Number	1.1, 1.2, 1.3, 1.4, 1.5, 1.6, 1.7
Expenditure Category Name	1.1 COVID-19 Vaccination 1.2 COVID-19 Testing 1.3 COVID-19 Contact Tracing 1.4 Prevention in Congregate Settings 1.5 Personal Protective Equipment 1.6 Medical Expenses 1.7 Other COVID-19 Public Health Expenses
Primarily Disadvantaged Households	Reporting required for 1.1 – 1.7 inclusive
<p>COVID Impact Statement</p> <p>Davis County's population is over 355,000 people and is Utah's third most populous County. Davis County is also the smallest geographic County in the State of Utah, making it very densely populated. The County is wedged between the Great Salt Lake and the Wasatch Mountains in the northern part of the State.</p> <p>Davis County is home to the largest number of earthquake faults in Utah as well as the highest hazmat threats. The hazmat threats include, but are not limited to, Hill Air Force Base, three refineries (two more just outside the border), and high transmission pipelines for oil, natural gas, alternate fuels, and water.</p> <p>Davis County has three rail lines running the length of our County, two industrial and one passenger. The passenger transports thousands of people throughout the County each day while the industrial lines transport significant amounts of hazardous materials. Davis County also has several major arterial freeways/highways, including Interstate 15, Legacy Parkway, and Highway 89. Threats from downed aircraft are also significant as we have a small Woods Cross City Airport and Hill Air Force Base, and we are on the flight path for Salt Lake International Airport.</p> <p>Wildfire threatens Davis County on both the east and west sides. Running the length of the County, the wildlands have been subject to several wildfires in recent years. As the population of Utah continues to grow faster than 48 other states, the wild spaces are being infringed upon for housing and industry causing more significant threats.</p> <p>As a whole Davis County has suffered from landslides and flooding and has a significant number of high wind events each year. In 2020, Davis County had high winds and earthquakes, resulting in a federally declared disaster. Utah is currently suffering from</p>	

extreme drought and low precipitation. The extreme temperature ranges in Utah seem to be worsening, calling for more focus on heating and cooling options for more vulnerable populations.

Davis County is home to several small cities. These cities do not typically have a significant amount of resources, and due to budgetary constraints do not employ consistent emergency management staff. This means many of the cities look to Davis County for support. During Covid-19, Davis County has assisted municipalities and responded to two significant earthquakes, flooding from a 100-year storm event, tornado damage, wildfire, high wind events, civil unrest, and drought.

Covid-19 complicates all aspects of the above-listed hazards, threats, or disasters. The need for our emergency management staff to have the space to collaborate, plan, train, and educate has never been greater. In our current scenario, we do not have the space or technology to effectively operate as we should moving into the future. The construction of an emergency management center would allow the County to make up a significant amount of ground in disaster operations and responding to Covid-19.

3. Staffing

Provide list of staff and time commitments to be allocated to each activity in the statement of work.

Key Staff Name	Title
Brian Hatch	Director of Health
Dave Spence	Dep Director of Health
Diana Reich	Division Director, Health Admin
Sarah Willardson	Division Director, Communicable Disease/Epidemiology
Sabrina Harmon	Division Director, Family Health

Any changes in the key personnel assigned or their general responsibilities under this project are subject to the prior approval of Davis County.

4. Performance Monitoring

Davis County will monitor the performance of the Subrecipient against goals and performance standards as stated above. Substandard performance as determined by Davis County will constitute noncompliance with this Agreement. If action to correct such substandard performance is not taken by the Subrecipient within a reasonable period of time after being notified by Davis County, contract suspension or termination procedures will be initiated.

Statement of Work

Funding is needed to continue COVID services to the public.
 Maintain an increased level of staffing for programs and administration.
 Develop guidance documents for community partners, businesses, schools, and stakeholders.
 Update communication, graphics, news releases, and social media posts to continue to educate and inform the public.
 Provide quick response to media and community questions.
 Attend trainings and meetings to learn of pertinent changes and instructions.
 Provide vaccine management for inventory and reporting.
 Coordinate and manage outreach clinics.
 Plan for medical supplies ordering and distribution.
 Determine the continued staff training needs.
 Coordinate and transfer vaccines as needed to pharmacies, clinics, and other health departments. *Maintain support of scheduling system developed for the COVID vaccinations.
 Coordinate staff participating in disease investigation.
 Continue efforts for contact tracing.
 Continue follow-ups on outbreaks in worksites, healthcare facilities, jails, group homes, etc.
 Provide consultation, recommendations, testing, and vaccinations.

Description of population to receive assistance

- All residents in Davis County have access to the COVID response services.
- The county has 18,631 residents that are considered below the poverty level. 35,726 county residents are below the 150% of poverty level ratio.
- Outreach efforts will include returning to long-term care facilities, rehabilitation facilities, and disabled adult centers. The estimated % of low-income served would be about 20%.

Description of process to ensure disadvantaged households are provided access to project

- All individuals have access to COVID services and responses.
- Davis County Health Department participated in the development of the Utah COVID-19 Vaccine Health
- Equity Plan supports Utah's efforts to ensure vaccine health equity and will use this information.
- The Davis County public health professionals will work with community partners to ensure disadvantaged households access services.
- Demographic characteristics of vaccine clients are compared to the overall aspects of the county to identify whether any demographic groups are underrepresented.
- Training will be provided to staff to address hesitancy, myths, misconceptions, and barriers to vaccination in diverse communities.

- There will be targeted outreach in zip codes and census tracts most severely affected by COVID, especially focused on groups with social or economic factors that put people at higher risk.
- Multiple registration options will be offered.
- Multicultural staff will help those who speak other languages.
- We will use multiple data sources to determine those who are most at-risk.
- We will use the DCHD 'Public Health Media Campaign & Strategy' (attached).
- Underserved populations will be reached through outreach.
- Increase geographic service through continued use of mobile units (vans) to host outreach events across the county.
- Address vaccine hesitancy.

--	---------------------------

Project Outline

- This project will help fund COVID response efforts by Davis County Public Health.
- Davis County COVID response looks at vaccination, testing, public health outreach, and coordination with community partners.
- Multiple site locations will allow for expanded reach and efficiency in serving clients.
- Coordinate and manage outreaches.
- Continue disease investigations on outbreaks in worksites, healthcare facilities, jails, group homes, etc.
- Continue to provide consultations and recommendations.

Vaccination, testing, and tracing sites:

1. Off-site clinic at the DCHD satellite office in Woods Cross, UT
2. The DCHD in Clearfield, UT.
3. Outreaches located at various locations in the County.

- Utilize the community by bringing together partners from human services, healthcare, education, cities, and other stakeholders to identify and address the community's health needs, create strategic alignment, and maximize efforts.
- Continue to support the scheduling system.
- Distribute PPE as requested or needed.
- As needed, provide Q/I housing.

DCHD will work with Davis County SLFRF and provide information on any activities not listed above that deals with COVID response

Project Outcome

- The Health Department COVID vaccination clinic gave over 280,000 vaccinations in 2021 (includes 32,631

doses are provided to residents of other counties, i.e., not DC residents).

- The average cost to run the vaccination clinic and response efforts was \$250,000 per month.
- Host vaccination clinics at locations around the community.
- Utilize mobile outreach to reach facilities serving high-risk populations and congregate living settings.
- Develop temporary mobile units that can be deployed to locations reaching vulnerable populations using venues like grocery stores, food banks, WIC, faith-based communities, etc.
- Coordinate with Midtown Community Health Center (Federally Qualified Health Center, FQHC) to make

vaccination clinics or events available at locations that work best for community members

- Promote all vaccine providers
- Partner with Davis School District for supply storage and vaccine clinics at school events
- Provide in-home vaccination opportunities.
- Planning and documenting procedures for the future.
- Forecasting using epidemiological studies, statistics, and analyses.
- Offer vaccines and boosters to eligible clients based on recipients of the previous two years.
- DCHD works with state and federal partners to anticipate and respond to the COVID pandemic, making it challenging to know future needs of DC residents.
- The environment is fluid and the DCHD will do its best to meet needs as they arrive.

The number of vaccinations, COVID services, and outreach provided will measure success

5. Schedule/Timeline

Timeline reflect the time from the start to end of subaward date.

Budget calculations should match figures in budget table.

	1Q 2022	2Q 2022	3Q 2022	4Q 2022
Activities	Personnel	Personnel	Personnel	Personnel
Budget Expenditures (SOW funding source only)	\$675,000	\$675,000	\$675,000	\$675,000

List all obligated funding sources individually and funding amounts for this project.

Funding Sources	Amount
ARPA	\$2,700,000.00

6. Budget Non-Construction

	ARPA	Other Federal Grants	State Funding	Local Funding, Grants, Donations	Other
