

Respiratory Illness Report - Week ending April 13, 2024

Published April 19, 2024

Overview

Influenza: Statewide influenza-like illness (ILI) and hospitalization rates in Utah remain in low severity. In Davis County, current ILI rates remained in minimal severity.

COVID-19 Wastewater Surveillance: As of April 11, overall statewide viral concentrations in wastewater are low. There are three sites (8.6%) in the Elevated category, four sites (11.4%) in the Watch category, and 28 sites (80.0%) in the Low category. In Davis County, the Central Davis site (Farmington/Kaysville area) is in the Elevated Category, the South Davis – South site (North Salt Lake area) is in the Watch category, and the remaining two sites are in the Low category. Explore statewide wastewater surveillance data at <https://avrpublic.dhhs.utah.gov/uwss/>.

Influenza-Like Illness

Graph 1 displays the weekly percentage of outpatient visits due to influenza-like illness (ILI). For comparison, the dashed line shows the previous 5-year average (2018-2022) of ILI activity. This week's ILI rate was 1.5%.

Graph 1. Percent of Outpatient Visits due to Influenza-Like Illness, by Week, Davis County, Utah

School Absenteeism

Graph 2 displays the weekly percentage of elementary school absenteeism in Davis School District. For comparison, the dashed line shows the absenteeism rate of the previous 5 school years (school years beginning 2018-2022). This week's absenteeism rate was 7.2%.

Graph 2. Percentage of Elementary School Absenteeism, by Week, Davis School District, Utah

Emergency Department Visits

Graph 3 displays the rolling 7 day average of the percent of emergency department (ED) visits due to COVID-19, influenza, and respiratory syncytial virus (RSV). These data are obtained from syndromic surveillance and only consider the diagnosis discharge codes for each condition. Table 1 presents two data points for each virus: the current trend of ED visits (increasing, decreasing, or no change), and the percent of ED visits due to each during the currently reported week.

Graph 3. Percent of ED Visits due to COVID-19, Influenza, & RSV, Rolling 7-day Average, Davis County, Utah

Table 1: Recent Trends of ED Visits, Davis County, Utah, for Week Ending Apr 13, 2024

Virus	Trend	Percent of ED Visits
COVID-19	Plateau/no trend (last 14 days)	0.5 %
Influenza	Decreasing (last 14 days)	0.3 %
RSV	Decreasing (last 14 days)	0.1 %

Hospitalizations

Graph 4 displays the weekly number of hospitalizations due to COVID-19 and influenza.
