

Respiratory Illness Report - Week ending December 20, 2025

Published December 22, 2025

Overview

Influenza: In Utah, influenza-associated hospitalizations and influenza-like illness (ILI) remain in low severity, but are increasing. In Davis County, ILI activity is minimal.

COVID-19 Wastewater Surveillance: As of December 16, overall statewide viral concentrations of SARS-CoV-2 in wastewater have remained relatively low. There is 1 site in the very elevated category (2.9%), 1 site in elevated (2.9%), 2 sites in watch (5.7%), 12 sites in low (34.3%), and 19 sites in the very low category (54.3%). In Davis County, all 4 sites are either in the low or very low category. Explore statewide wastewater surveillance data and trends at <https://avrpublish.dhhs.utah.gov/uwss/>.

Influenza-Like Illness

Graph 1 displays the weekly percentage of outpatient visits due to influenza-like illness (ILI). For comparison, the dashed line shows the previous 5-year average (2020-2024) of ILI activity. This week's ILI rate was 6.9%.

Graph 1. Percent of Outpatient Visits due to Influenza-Like Illness, by Week, Davis County, Utah

School Absenteeism

Graph 2 displays the weekly percentage of elementary school absenteeism in Davis School District. For comparison, the dashed line shows the absenteeism rate of the previous 5 school years (school years beginning 2020-2024). This week's absenteeism rate was 6.9%.

Graph 2. Percentage of Elementary School Absenteeism, by Week, Davis School District, Utah

Emergency Department Visits

Graph 3 displays the rolling 7 day average of the percent of emergency department (ED) visits due to COVID-19, influenza, and respiratory syncytial virus (RSV). These data are obtained from syndromic surveillance and only consider the diagnosis discharge codes for each condition. Table 1 presents two data points for each virus: the current trend of ED visits (increasing, decreasing, or no change), and the percent of ED visits due to each during the currently reported week.

Table 1: Recent Trends of ED Visits, Davis County, Utah, for Week Ending Dec 20, 2025

Virus	Trend	Percent of All ED Visits
COVID-19	Plateau/no trend (last 14 days)	0.2 %
Influenza	Increasing (last 14 days)	4 %
RSV	Plateau/no trend (last 14 days)	0 %

Hospitalizations

Graph 4 displays the weekly rate of hospitalizations per 100,000 people due to COVID-19 and influenza.
