

IMMUNIZATION GUIDE FOR HEALTHCARE PROVIDERS

IMPROVING CHILD AND ADULT IMMUNIZATION RATES THROUGH A COMMUNITY FOCUSED CLINIC

About Us:

Our full service immunization clinic at the Davis County Health Department is aimed at promoting vaccine education and increased immunization rates within our community.

Who is Eligible?

- Anyone is eligible
- Many insurance plans accepted
- Assistance programs are available for those who qualify

Services Available:

ROUTINE VACCINATIONS

Available for all, including:

- Infant immunizations
- Back to school immunizations
- Vaccines during pregnancy
- Senior vaccinations
- Seasonal vaccinations

VACCINES FOR CHILDREN PROGRAM (VFC)

Children 18 years or younger who are uninsured may be eligible for all childhood and adolescent vaccines outlined necessary by the Advisory Committee on Immunization Practices at reduced cost

INTERNATIONAL TRAVEL CLINIC

Registered nurses offer travel consultations and travel immunizations. Topics discussed during consultation include:

- Possible health risks & personal protection measures
- Food & water safety tips
- High altitude sickness & motion sickness
- Traveling while pregnant
- Medication for travel related illness

How Can Your Patients Benefit?

In-home vaccinations available to homebound residents

Mobile clinic and community outreach increase accessibility to residents

Affordable vaccinations for uninsured children and adults

Help Connect Families to Our Clinic

- Refer patients traveling outside the U.S. to our international travel clinic for consultation and travel related vaccines
- Encourage uninsured families with children to apply for the Vaccines for Children (VFC) program
- Refer homebound patients to our in-home vaccination program

How Can You Help?

Healthcare provider recommendations are the best way to increase immunization rates within our community
