INFLUENZA ACTIVITY IN DAVIS COUNTY

Influenza activity in Davis County has been at a minimal level so far this season. The average school absence rate for Week 46 (4.75%) was slightly elevated compared to last year (see Figure 1). Fewer than five hospitalized influenza cases were reported in Davis County in Week 46, bringing the season total to five cases. The influenza-like illness (ILI) rate (1.9%) for Week 46 remains low (see Figure 2).

Figure 1. Elementary School Absence Rate, Davis County, 2019-20, 2018-19, 5-Year Average

Influenza-like Illness (ILI) is defined as fever (temperature of ≥ 100° F [37.8° C]), cough, and/or a sore throat without a known cause other than influenza.

INFLUENZA ACTIVITY IN UTAH*

Utah’s influenza rate remained at a low level during Week 46. There were fewer than five hospitalized influenza cases reported during Week 46 in the state of Utah, with a total of 17 cases so far this season.

Surveillance data for influenza testing in laboratories across Utah indicate that 33 specimens were positive for influenza during Week 46. Currently, the predominant circulating virus is influenza A, however, rates of influenza B are higher than normal for this point of the season.

INFLUENZA ACTIVITY IN THE UNITED STATES**

During Week 45, influenza activity continues to increase throughout the United States. Rhode Island reported no activity during Week 45, while 19 states (including Utah) reported sporadic activity, 20 states reported local activity, seven states reported regional activity, and three states reported widespread activity. (see Figure 3).

Data from collaborating clinical laboratories across the United States is not currently available for Week 45 due to technical issues. Reporting will resume once the issues have been resolved.

CDC performs genetic and antigenic characterization of U.S. viruses submitted from state and local laboratories. The specimens are also tested for susceptibility of influenza virus to antiviral medications. Virus characterization data will be updated later this season when a sufficient number of specimens have been tested.

VACCINE INFORMATION

CDC recommends that all persons older than 6 months of age receive an influenza vaccine by the end of October.

Flu shots are available at Davis County Health Department at no out-of-pocket cost for those with contracted health insurance.

For those without insurance:
- Adults (19+ years) can receive the flu shot for $30.
- Seniors (65+ years) can receive high-dose Fluzone® for $45.
- Children and adolescents (<19 years) may receive the vaccine for an $8 fee.

For additional information, call the Immunizations Hotline at (801) 525-5020.
